Sun Pro solar panels saving the environment and energy costs

BY CB STAFF

With more than 150 installations of solar systems around the island, Sun Pro is making a substantial contribution to reducing the carbon footprint in Puerto Rico, making the environment cleaner and enabling its growing client base to realize significant savings in energy costs, ac-

in Puerto Rico, installing a solar system should be a 'no-brainer' for businesses and individuals alike."

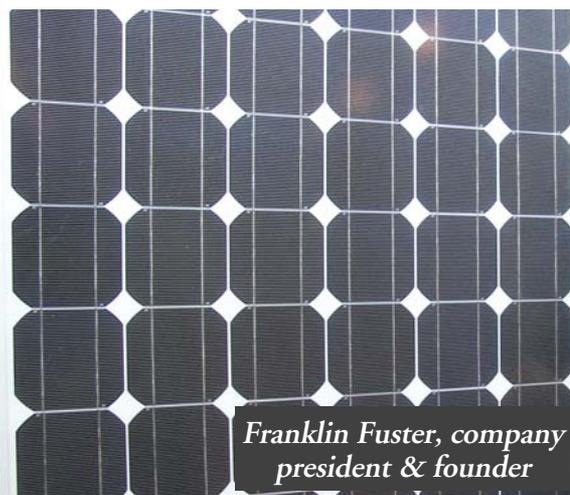

Solar systems can pay for themselves in about five to eight years, he explained. Further, the Tier One program of the Puerto Rico Green Energy Fund will reimburse up to 30% of the total cost of installing a solar system. The Tier One program

Fuster said. "The average cost of such a system is in the neighborhood of \$16,500, without the government incentive. When you factor in the 30% solar incentive, the total cost should be around \$11,500."

In addition, Sun Pro can arrange financing for as little as 2.99% interest for up to 12 years for clients with good credit ratings.

Energy Authority and the College of Engineers.

"Our experience in the field of construction on the island separates us from other providers of solar systems because we are dedicated to delivering the best possible service, from working with clients to meeting their specific requirements through installation and follow-up customer

Franklin Fuster, company president & founder

ording to Franklin Fuster, company president & founder.

"The savings in energy costs alone can range from 50% to as much as 100%, depending on the customer's energy usage. A well-designed solar system is very reliable, in addition to being cost efficient," said Fuster, who is also an industrial engineer. "Given the high cost of electric power

is an incentive for small commercial and residential users, who consume up to 100 kilowatts (kW) of electricity a month.

INCENTIVES PROVIDED

"The average household in Puerto Rico consumes about 650 kW a month, which can be efficiently served with a 5.5 kW solar system,"

Sun Pro was founded by Fuster in 2007, based on his more than 20 years of experience in the construction industry. "We are one of the first companies in Puerto Rico to realize the potential of the solar energy field for our customers," he noted. The company employs 15 electrical technicians and engineers who are certified by Puerto Rico's Electrical

service," he emphasized. Sun Pro solar panels also come with a 20-year warranty from the manufacturer.

"Our suppliers of solar panels and other materials are among the most technologically advanced in the market and we configure solar arrays that meet the specific demands of both commercial and residential clients," he added. ■
